ABOUT US

Welcome to Baysalex International Trade Inc., your premier destination for heavy equipment spare parts worldwide. Established in 2024, Baysalex builds upon over a decade of expertise in the industry. Since 2009, we've been dedicated to supplying top-quality spare parts for heavy machinery, ensuring the smooth operation of equipment across various sectors.

At Baysalex, we understand the critical role that reliable parts play in keeping your operations running smoothly. That's why we specialize in offering a comprehensive range of original and aftermarket parts for leading brands such as Komatsu, CAT, Volvo, and more. From bulldozers to excavators, loaders to dump trucks, we've got you covered with the parts you need to keep your machinery performing at its best.

Headquartered in Canada, our global reach allows us to serve clients across the world. Whether you're located in North America, Europe, Asia, Africa, or beyond, we're committed to providing prompt and efficient service to meet your spare parts needs.

What sets Baysalex apart is our unwavering dedication to customer satisfaction. Our team of experts is here to assist you every step of the way, from identifying the right parts for your specific requirements to ensuring timely delivery to your doorstep. With Baysalex, you can trust that you're getting not only top-quality parts but also exceptional service tailored to your needs.

Thank you for choosing Baysalex as your trusted partner for heavy equipment spare parts. We look forward to serving you and exceeding your expectations.

Original Equipment Manufacturer (OEM) Parts:

As an authorized dealer of OEM parts, we offer a comprehensive selection of components sourced directly from the manufacturers of leading brands. OEM parts are engineered to exact specifications and undergo rigorous testing to meet the highest standards of quality and performance. When you choose OEM parts from BAYSALEX, you can trust that you're getting genuine products designed to seamlessly integrate with your machinery, ensuring optimal fit, function, and reliability.

In addition to OEM parts, we also offer a wide range of aftermarket machinery spare parts sourced from reputable manufacturers known for their commitment to quality and reliability. Our aftermarket parts provide cost-effective alternatives to OEM components without compromising on performance or durability.

Whether you're looking for replacement parts, upgrades, or specialized components, our extensive inventory has you covered. With competitive pricing and a focus on value, we strive to meet your needs while maximizing your investment.

BEST PRODUCT

OUR STEPS

OUR CONTROL

SHIPPING METHOD

EXW - FCA - CPT - CIP - DAP - DPU - DDP

Incoterms (International Commercial Terms) for any mode of transport are designed to regulate international trade transactions where goods are transported by any means, such as road, rail, air, or sea. The current set of Incoterms includes terms like EXW (Ex Works), FCA (Free Carrier), CPT (Carriage Paid To), CIP (Carriage and Insurance Paid To), DAP (Delivered at Place), DPU (Delivered at Place Unloaded), and DDP (Delivered Duty Paid). These terms specify the responsibilities and obligations of the buyer and seller regarding the delivery, transportation, insurance, and customs clearance of the goods.

CANADA POST

Nationwide Coverage: Canada Post's extensive network spans across the vast Canadian landscape, offering comprehensive coverage from coast to coast. Whether it's urban centers or remote regions, Canada Post delivers parcels to every corner of the country.

DHL - UPS

Express Delivery Options Worldwide: DHL and UPS are renowned for their express delivery services, offering expedited shipping solutions for time-sensitive shipments. You can rely on DHL and UPS to deliver parcels swiftly and efficiently to international destinations.

SEA CARGO TRANSPORTATION

Cost Effectiveness: Shipping goods by sea is generally more cost-effective, especially for large and heavy items or bulk shipments. Making it a preferred option for businesses looking to reduce shipping costs.

Sustainability: Sea transportation is generally considered a more environmentally friendly mode of transportation compared to air transportation, as it produces less carbon emissions per unit of cargo transported. For businesses with sustainability goals, choosing ocean shipping can help reduce their carbon footprint.

Partnership: Our partner company in maritime transportation is MSC (Mediterranean Shipping Company).

AIR CARGO

Air cargo transportation offers unparalleled speed, making it ideal for time-sensitive shipments. In scenarios where a work machine breaks down at a construction site, minimizing downtime is critical to maintaining productivity and avoiding costly delays. Due to faster transit times compared to sea transportation, businesses often opt for air cargo to expedite the delivery of replacement parts or equipment to construction sites worldwide.

For businesses prioritizing time over finances, fast shipping options provided by all Star Alliance airline companies, particularly Air Canada, offer a reliable solution. Whether it's a small component or a large piece of machinery, expedited air cargo services offered by Air Canada and other Star Alliance members facilitate timely deliveries to meet the demands of time-sensitive situations, ensuring seamless operations at construction sites worldwide.

Thank You

Global Reach, Local Touch

Thank you for choosing Baysalex as your trusted partner for heavy equipment spare parts. We look forward to serving you and exceeding your expectations.
